Contents

Preface *ix*

1	Molecular Gel as Medium or Intermediate in Functional Materials Synthesis 1 Rong Miao and Junxia Peng	
1.1	Introduction 1	
1.2	Molecular Gel as Intermediate in Synthesizing Fluorescent Sensing Films with High Performance 2	
1.2.1	Molecular Design 3	
1.2.2	Molecular Gel Strategy-Based Sensing Film for VOC Vapor Detection	
1.2.3	Molecular Gel Strategy-Based Film for Chemicals Sensing in Liquid Phase 9	
1.3	Molecular Gel as Intermediate in Synthesizing Porous Materials 9	
1.3.1	Porous Materials for Removal of Oil on Water Surface 11	
1.3.2	Porous Materials for VOCs Adsorption 13	
1.4	Summary and Perspectives 14	
	References 16	
2	Preparation and Sensing Application of Fluorescent	
	Organogels and Hydrogels 21	
	Yudona Yu Lijun Gena and Jianaho Guo	
21	Autong Tu, Lijun Geng, und Hangbo Guo	
2.1	Introduction 21	
2.1	Introduction 21 Types of Gels that Respond to Different Stimuli 22	
2.2 2.2.1	Introduction 21 Types of Gels that Respond to Different Stimuli 22 Fluorescent Gels that Respond to Physical Stimuli 22	
2.2 2.2.1 2.2.1 2.2.1.1	Introduction 21 Types of Gels that Respond to Different Stimuli 22 Fluorescent Gels that Respond to Physical Stimuli 22 Fluorescent Gels that Respond to Heat 22	
2.2 2.2.1 2.2.1 2.2.1.1 2.2.1.2	Introduction 21 Types of Gels that Respond to Different Stimuli 22 Fluorescent Gels that Respond to Physical Stimuli 22 Fluorescent Gels that Respond to Heat 22 Fluorescent Gels that Respond to Light 23	
2.2 2.2.1 2.2.1.1 2.2.1.2 2.2.1.2 2.2.1.3	Introduction 21 Types of Gels that Respond to Different Stimuli 22 Fluorescent Gels that Respond to Physical Stimuli 22 Fluorescent Gels that Respond to Heat 22 Fluorescent Gels that Respond to Light 23 Fluorescent Gels that Respond to Ultrasound 25	
2.2 2.2.1 2.2.1.1 2.2.1.2 2.2.1.3 2.2.1.4	Introduction 21 Types of Gels that Respond to Different Stimuli 22 Fluorescent Gels that Respond to Physical Stimuli 22 Fluorescent Gels that Respond to Heat 22 Fluorescent Gels that Respond to Light 23 Fluorescent Gels that Respond to Ultrasound 25 Fluorescent Xerogels that Respond to Grinding or Pressure 28	
2.1 2.2 2.2.1 2.2.1.1 2.2.1.2 2.2.1.3 2.2.1.4 2.2.2	Introduction 21 Types of Gels that Respond to Different Stimuli 22 Fluorescent Gels that Respond to Physical Stimuli 22 Fluorescent Gels that Respond to Heat 22 Fluorescent Gels that Respond to Light 23 Fluorescent Gels that Respond to Ultrasound 25 Fluorescent Xerogels that Respond to Grinding or Pressure 28 Fluorescent Gels for Visual Chemical Stimulus Sensing 30	
2.1 2.2 2.2.1 2.2.1.1 2.2.1.2 2.2.1.3 2.2.1.4 2.2.2 2.2.2.1	Introduction 21 Types of Gels that Respond to Different Stimuli 22 Fluorescent Gels that Respond to Physical Stimuli 22 Fluorescent Gels that Respond to Heat 22 Fluorescent Gels that Respond to Light 23 Fluorescent Gels that Respond to Ultrasound 25 Fluorescent Xerogels that Respond to Grinding or Pressure 28 Fluorescent Gels for Visual Chemical Stimulus Sensing 30 Fluorescent Gels for Cation Sensing 30	

- 2.2.2.3
- Fluorescent Gels for CO₂ Sensing 37 Fluorescent Gels for Solvent and Humidity Sensing 38 2.2.2.4

4

vi	Contents

- 2.2.2.5 Fluorescent Gels for Nitroaromatic Derivative Sensing 42
- 2.2.2.6 Fluorescent Gels for Amine Sensing 42
- 2.3 Summary and Perspectives 45 References 46
- **3** Preparation of Self-Assembled Composite Hydrogels and Their Application in Biomedicine and Wastewater Treatment 51

Ran Wang, Jingxin Zhou, Lexin Zhang, and Tifeng Jiao

- 3.1 Introduction 51
- 3.2 Prepared Composite Hydrogels Used in Biomedicine 52
- 3.2.1 Self-Assembly and Drug Release Capacities of Organogels via Some Amide Compounds with Aromatic Substituent Headgroups 52
- 3.3 Prepared Composite Hydrogels Used in Wastewater Treatment 55
- 3.3.1 Preparation and Self-assembly of Some Functionalized Supramolecular Hydrogels 55
- 3.3.2 Preparation and Self-assembly of Some Graphene Oxide-Based Composite Hydrogels 57
- 3.4 Conclusion and Perspectives 64 Acknowledgments 65 References 65

4 Conductive Hydrogels for Flexible Mechanical Sensors 71 Zhihui Qin and Tifeng Jiao

- 4.1 Introduction 71
- 4.2 Fabrication of Conductive Hydrogels 73
- 4.2.1 Electronically Conductive Hydrogel 74
- 4.2.2 Ionically Conductive Hydrogels 78
- 4.3 Conductive Hydrogel-Based Mechanical Sensors 80
- 4.3.1 Strain Sensors 81
- 4.3.2 Pressure Sensors 85
- 4.4 Conclusion and Outlook 89 Acknowledgments 90 References 90

5 Recent Progress on Heat-Set Molecular Gels 99

Yuangang Li, Zonglin Yang, Yong Chen, Huajing Li, Rong Yang, and Chenyu Huang

- 5.1 Introduction 99
- 5.2 Heat-Set Molecular Gels 101
- 5.2.1 Heat-Set Molecular Hydrogel 101
- 5.2.2 Heat-Set Organic Gel 110
- 5.3 Conclusion and Perspectives 118 Acknowledgements 120 References 120

6 Supramolecular Gels from Carbohydrate Biopolymers for Water Remediation 127

Xuefeng Zhang and Weiqi Leng

- 6.1 Introduction 127
- 6.2 Hydrogels from Carbohydrate Biopolymers 128
- 6.2.1 Hydrogels from Native Cellulose or Chitin 129
- 6.2.2 Hydrogels from Cellulose or Chitin Derivatives 130
- 6.2.3 Hydrogels from Biopolymer Nanomaterials 132
- 6.2.3.1 Hydrogels from Physically Cross-Linked NC or NCh 134
- 6.2.3.2 Hydrogels from Chemically Cross-Linked NC or NCh 137
- 6.3 Aerogels from Carbohydrate Biopolymers 138
- 6.4 Biopolymer-Derived Gels for Water Remediation 140
- 6.4.1 Heavy Metal Removal 141
- 6.4.2 Organic Pollutants Removal 146
- 6.5 Conclusions and Perspectives 156 References 156

7 Biobased Aerogels for Oil Spill Remediation 169

Weiqi Leng, Sheng He, Xuefeng Zhang, Xiang Wang, and Chanaka M. Navarathna

- 7.1 Introduction 169
- 7.2 Aerogels: Classification, Fabrication, and Properties 172
- 7.2.1 Classification of Aerogels 172
- 7.2.2 Fabrication of Biobased Aerogels 173
- 7.2.2.1 Supercritical Drying 177
- 7.2.2.2 Freeze-drying 179
- 7.2.3 Functionalization of Biobased Aerogels 186
- 7.3 Biobased Aerogels for Oil Spill Remediation 193
- 7.3.1 Parameters That Affect the Oil Absorption Performance 193
- 7.3.2 Mechanisms of Oil Absorption 197
- 7.3.3 Post-processing of Aerogel Absorbent After Oil Spill Remediation 200
- 7.4 Conclusion and Future Scope 201 References 201

8 Luminescent Supramolecular Gels 215

Xue Jin and Pengfei Duan

- 8.1 Introduction 215
- 8.2 Fluorescence in Supramolecular Gels 216
- 8.3 Phosphorescence in Supramolecular Gels 219
- 8.4 Upconverted Luminescence in Supramolecular Gels 224
- 8.5 Circularly Polarized Luminescence in Supramolecular Gels 230
- 8.5.1 CPL-Active Gel Based on Chiral Luminescent Gelators 234
- 8.5.2 CPL-Active Supramolecular Gel Based on Achiral Luminescent Gelators 238

viii Contents

8.5.3	CPL-Active Supramolecular Gel by Using Organic Luminophores as
	Guests 239
8.5.4	CPL-Active Supramolecular Gel Based on Inorganic Luminescence
	Guest 245
8.6	Conclusion and Perspectives 249
	Acknowledgments 250
