FOREWORD _6

INTRODUCTION _7

FUNDAMENTALS OF ACOUSTICS _9

Key variables in physics _9

Sound propagation _14

Perception of sound _20

SOUND IMMISSION PROTECTION _25

Protection objectives _25

Emission – Immission _25

Assessment of sound immissions _26

Legal background _27

Noise-reducing measures _28

Building orientation and floor plan design _29

Design-based noise protection measures _32

BUILDING ACOUSTICS _34

Airborne sound – impact sound _34

Key building acoustics variables _35

Influence of secondary pathway transmission _37

Single-skin building components _38

Double-skin building components _41

Impact sound insulation _47

Services installations _50

Sound protection – external building components _53

ROOM ACOUSTICS _56

Key room acoustics variables _56

Sound propagation in rooms _60

Room acoustics measures _60

Room acoustics requirements _64

Acoustic design of rooms _67

Inclusion and barrier freedom in acoustics _71

Measuring reverberation time _72

SUMMARY _73

APPENDIX _74

Bibliography _74

Figures _74
