| Preface | V |
| Foreword | VII |
| Foreword 2 | IX |
| The Authors | XI |
| The Editor | XI |
| The Coauthors | XII |
| Glossary | XV |
| PART A: Fundamentals; Legislative, Economic, and Political Considerations; LCA | 1 |
| 1 Introduction | 3 |
| <i>Norbert Nießner</i> | |
| 1.1 Industrial Aspects | 4 |
| 1.2 Plastics Pollution | 9 |
| 1.3 Plastics Pollution: Bio Solution? | 12 |
| 1.4 Recycling Methods: Closing the Loop | 20 |
| 1.5 Summary | 22 |
| 2 Introduction to Major Thermoplastic Polymers in the Context of Recycling | 25 |
| <i>Tristan Kolb, Andreas Schedl, Hans-Werner Schmidt</i> | |
| 2.1 Chemical Structure and Synthesis of Industrial Polymers | 26 |
| 2.1.1 Polymer Architecture | 26 |
| 2.1.2 Polymers in the Solid State | 30 |

| | | |
|----------|--|-----------|
| 2.1.3 | Categorization of Polymers | 31 |
| 2.1.4 | Polymerization | 32 |
| 2.1.4.1 | Chain-Growth Polymerization | 33 |
| 2.1.4.2 | Step-Growth Polymerization | 38 |
| 2.2 | Polymer Degradation and Recycling | 42 |
| 2.2.1 | Physical Aging | 42 |
| 2.2.2 | Chemical Aging | 43 |
| 2.2.2.1 | Thermal and Thermomechanical Aging | 44 |
| 2.2.2.2 | Oxidative Aging | 46 |
| 2.2.2.3 | Aging by Hydrolysis and Biological Processes | 48 |
| 2.3 | The World of Thermoplastic Industrial Polymers | 50 |
| 2.3.1 | Overview of Polymer Classes and Use | 50 |
| 2.3.2 | Profiles of Important Commercial Polymers | 53 |
| 2.3.2.1 | Polyethylene | 53 |
| 2.3.2.2 | Polypropylene | 55 |
| 2.3.2.3 | Polyvinyl Chloride | 57 |
| 2.3.2.4 | Polystyrene | 58 |
| 2.3.2.5 | Polyethylene Terephthalate | 59 |
| 2.3.2.6 | Polyamide | 61 |
| 2.3.2.7 | Polycarbonate | 64 |
| 2.3.2.8 | Poly(methyl methacrylate) | 65 |
| 2.3.2.9 | Polytetrafluoroethylene | 67 |
| 3 | Legislation | 71 |
| | <i>Michael Ulbrich, Sören Hörnigke</i> | |
| 3.1 | A Categorization of Regulatory Approaches to Promote Recycling | 72 |
| 3.1.1 | Legal Measures | 73 |
| 3.1.2 | Financial Measures | 77 |
| 3.2 | Approaches in Various World Regions | 79 |
| 3.2.1 | Global Regulation | 79 |
| 3.2.2 | Europe | 80 |
| 3.2.3 | APAC | 84 |
| 3.2.4 | NAFTA | 85 |
| 3.2.5 | Rest of the World | 86 |
| 4 | Economics | 91 |
| | <i>Michael Ulbrich, Marvin Stiefermann</i> | |
| 4.1 | Economic Challenges of Recycling Plastics | 91 |
| 4.2 | Framework for Recycling Business Cases | 93 |
| 4.2.1 | Illustration 1: Chemical Recycling of Polyolefins | 94 |

| | | |
|----------|---|------------|
| 4.2.2 | Illustration 2: Chemical Recycling of PET | 96 |
| 4.2.3 | Illustration 3: Microwave-Assisted Depolymerization of Styrene | 97 |
| 4.3 | Implications and Outlook | 99 |
| 5 | Political Boundary Conditions – Plastics Waste Management | 103 |
| | <i>Klaus Wittstock, Victoria Wessolowski</i> | |
| 5.1 | Plastics Recycling and Its Political Relevance | 103 |
| 5.2 | Overview of Political Measures Related to Plastic Waste Management | 115 |
| 5.2.1 | Global Plastic Waste Management | 117 |
| 5.2.2 | Plastic Waste Management in Europe | 121 |
| 5.2.3 | Plastic Waste Management in Germany | 126 |
| 5.2.4 | Plastic Waste Management in China | 131 |
| 5.2.5 | Plastic Waste Management in the United States of America ... | 133 |
| 5.3 | Developments and Political Trends in Plastic Waste Management | 136 |
| 5.3.1 | Harmonization of Legal Aspects | 136 |
| 5.3.2 | Restrictions on Microplastics | 139 |
| 5.3.3 | Transparency on Chemicals | 141 |
| 5.3.4 | Eco-Design, Design for Recycling and Design for Sustainability | 143 |
| 5.3.5 | Economic Instruments | 145 |
| 5.3.6 | New Recycling Technologies | 150 |
| 5.3.7 | Replacement of Virgin by Recycled Content | 152 |
| 5.3.8 | Keeping Carbon in the Loop | 153 |
| 5.3.9 | Conclusion | 154 |
| 6 | Life Cycle Assessment (LCA) | 161 |
| 6.1 | Introduction: What Is Life Cycle Assessment? | 161 |
| | <i>Peter Saling</i> | |
| 6.1.1 | History and General Aspects | 161 |
| 6.1.2 | LCA Principles Defined by ISO Standards | 162 |
| 6.1.2.1 | Definitions | 162 |
| 6.1.2.2 | Goal and Scope of an LCA Study | 163 |
| 6.1.2.3 | Life Cycle Inventories | 166 |
| 6.1.2.4 | Processes with Co-Products | 166 |
| 6.1.2.5 | Allocation in Recycling Processes | 167 |
| 6.1.3 | Impact Assessment | 168 |
| 6.1.3.1 | Environmental Footprint of the EU | 169 |
| 6.1.3.2 | Impact Categories Used by BASF LCA Methods | 174 |
| 6.1.4 | Interpretation | 175 |

| | | |
|---|--|------------|
| 6.1.5 | Examples of LCA Studies in the Recycling Context | 176 |
| 6.1.5.1 | Recycling of PET | 176 |
| 6.1.5.2 | Recycling of WEEE | 177 |
| 6.1.5.3 | ChemCycling™ of Plastic Waste from Packaging | 179 |
| 6.1.5.4 | Eco-Efficiency Analysis | 181 |
| 6.1.6 | Summary | 183 |
| 6.2 | Life Cycle Assessment for Different Recycling Routes of Polystyrene .. | 189 |
| | <i>Regino Weber, Thomas Neumeyer</i> | |
| 6.2.1 | Background of the Study | 189 |
| 6.2.2 | Different Recycling Technologies for Polystyrene Waste | 190 |
| 6.2.3 | Goal and Scope of the Study | 191 |
| 6.2.4 | Data for Life Cycle Inventory (LCI) | 198 |
| 6.2.5 | Life Cycle Impact Assessment (LCIA) Results | 202 |
| 6.2.6 | Analysis and Interpretation | 208 |
| 6.2.7 | Conclusion | 210 |
| 6.3 | Life Cycle Assessment of a New Monomer Recycling Process for PET .. | 212 |
| | <i>Mandy Paschetag, Hannes Schneider, Stephan Scholl</i> | |
| 6.3.1 | The revolPET® Process | 214 |
| 6.3.2 | Goal and Scope of the Study | 214 |
| 6.3.3 | Data for Life Cycle Inventory (LCI) | 221 |
| 6.3.4 | Results of the Life Cycle Impact Assessment (LCIA) | 222 |
| 6.3.5 | Analysis and Interpretation | 232 |
| PART B: Major Recycling Technologies | | 239 |
| 7 | Overview of Major Recycling Technologies | 241 |
| | <i>Christian Hopmann, Rainer Dahlmann, Martin Facklam</i> | |
| 7.1 | Introduction | 241 |
| 7.2 | Mechanical Recycling | 247 |
| 7.3 | Feedstock Recycling | 252 |
| 7.3.1 | Chemical Recycling | 253 |
| 7.3.2 | Solvolytic-Based Recycling | 256 |
| 7.3.3 | Thermochemical Processes | 261 |
| 7.3.4 | Biodegradation | 266 |
| 8 | Mechanical Recycling | 275 |
| 8.1 | Basic Principles | 275 |
| | <i>Achim Schniemann</i> | |
| 8.1.1 | Coarse or Preliminary Shredding | 279 |
| 8.1.2 | Medium Size Shredding | 285 |

| | | |
|---------|---|-----|
| 8.1.3 | Comminution of Bonded Materials | 287 |
| 8.1.4 | Classifying and Sorting | 290 |
| 8.1.5 | Extrusion | 295 |
| 8.2 | Mechanical Recycling of Polyolefins | 301 |
| | <i>Marco Amici</i> | |
| 8.2.1 | Introduction – Market Size and Recycling Challenge | 301 |
| 8.2.2 | Main PO Applications | 301 |
| 8.2.3 | Common Processes for Mechanical Recycling of PO | 302 |
| 8.2.4 | Mechanical Recycling of Rigid PO: Processes and Physico-Chemical Changes | 304 |
| | 8.2.4.1 High-Density PE (HDPE) | 305 |
| | 8.2.4.2 Polypropylene (PP) | 306 |
| | 8.2.4.3 PE/PP Blends | 307 |
| 8.2.5 | Mechanical Recycling of Flexible PO: Processes and Physico-Chemical Changes | 313 |
| | 8.2.5.1 Industrial films | 313 |
| | 8.2.5.2 Multilayer Flexible Packaging | 314 |
| 8.2.6 | Food Contact Regulations for Mechanically Recycled PO | 315 |
| 8.3 | Mechanical Recycling of PET | 317 |
| | <i>Thomas Schröder</i> | |
| 8.3.1 | Introduction | 318 |
| 8.3.2 | Market Overview and Fields of Application | 320 |
| 8.3.3 | Circular Economy of PET Bottles | 322 |
| 8.3.4 | Bottle-to-Bottle Recycling of PET | 324 |
| | 8.3.4.1 Bottle-to-Flake Processes | 324 |
| | 8.3.4.2 Deep Cleaning Processes for PET Flakes | 325 |
| 8.3.5 | Barriers to the Use of Recycled PET | 328 |
| 8.4 | Mechanical Recycling of Styrenics | 331 |
| 8.4.1 | Mechanical Recycling of Polystyrene | 331 |
| | <i>Herman Van Roost</i> | |
| 8.4.1.1 | Introduction – Quality-Driven Circularity | 331 |
| 8.4.1.2 | Adequate Recyclate Quality | 333 |
| | 8.4.1.2.1 Practical Quality Standard | 333 |
| | 8.4.1.2.2 Virgin Equivalency | 333 |
| | 8.4.1.2.3 Purity vs. Polymer Properties | 335 |
| 8.4.1.3 | The Importance of Food Contact Quality for Recyclates | 341 |
| | 8.4.1.3.1 Food Contact in the Virgin Industry Context | 341 |
| | 8.4.1.3.2 The PET Bottle Recycling Reference | 343 |
| | 8.4.1.3.3 Many Ways for a Recyclate to be Non-Food-Contact | 344 |

| | | |
|-----------|---|-----|
| 8.4.1.3.4 | A Virtuous Circle towards Plastics Circularity | 346 |
| 8.4.1.4 | Food Contact Mechanical Recycling Process of PS .. | 347 |
| 8.4.1.4.1 | Deep Sorting | 347 |
| 8.4.1.4.2 | Hot Washing | 349 |
| 8.4.1.4.3 | Flake Sorting | 352 |
| 8.4.1.4.4 | Super-Cleaning | 354 |
| 8.4.1.4.5 | Extrusion and Melt Filtration | 358 |
| 8.4.1.4.6 | Industrial Blueprint for a High-Purity PS Recycling Plant | 359 |
| 8.4.1.5 | Waste Feedstock for Circular PS | 361 |
| 8.4.1.5.1 | PS Packaging in EU Waste Streams | 361 |
| 8.4.1.5.2 | The Potential of Pre-Incinerator Extraction | 363 |
| 8.4.1.6 | Circularity of Polymers – The Unique Position of PS | 365 |
| 8.4.1.6.1 | Open Loop vs. Closed Loop: Is that Really the Question? | 365 |
| 8.4.1.6.2 | A Material’s Circularity and Circular Matrix | 366 |
| 8.4.1.6.3 | Circular Unification of Rigid and Foamed PS | 370 |
| 8.4.1.7 | Circular Design of PS Packages | 371 |
| 8.4.1.7.1 | Design for Increased Circular Yield | 371 |
| 8.4.1.7.2 | Generalized Packaging Design for Food Contact | 373 |
| 8.4.2 | Mechanical Recycling of Styrene Copolymers | 375 |
| | <i>Eike Jahnke</i> | |
| 8.4.2.1 | Introduction | 375 |
| 8.4.2.2 | The Chemistry of PS and ABS during Production, Processing and During Their Life Cycles | 378 |
| 8.4.2.3 | Prospects, Prerequisites and Limitations of the Mechanical Recycling of Styrenics | 384 |
| 8.4.2.4 | Mechanically Recycled PCR ABS – An Economic Case Study | 391 |
| 8.4.2.5 | Conclusion | 394 |
| 8.4.3 | Mechanical Recycling of Expandable Polystyrene (EPS) | 397 |
| | <i>Norbert Nießner</i> | |
| 8.5 | Mechanical Recycling of Engineering Thermoplastics | 399 |
| | <i>Hannah Mangold, Caroline Beyer</i> | |
| 8.5.1 | Market Size and Recycling Challenge | 400 |
| 8.5.2 | Major Applications and Recycling Process | 402 |

| | | |
|-----------|--|------------|
| 8.5.2.1 | Polyamides | 402 |
| 8.5.2.1.1 | Polyamide 6 | 402 |
| 8.5.2.1.2 | Polyamide 66 | 404 |
| 8.5.2.2 | Polyurethanes | 406 |
| 8.5.2.2.1 | Rebonding with Adhesives | 406 |
| 8.5.2.2.2 | Molding and Extrusion | 406 |
| 8.5.2.2.3 | Regrinding and Powdering | 407 |
| 8.5.2.2.4 | Solvent-Based Recycling | 407 |
| 8.5.2.3 | Other Engineering Plastics | 407 |
| 8.5.3 | Major Applications of Recycled Engineering Plastics | 408 |
| 8.6 | Mechanical Recycling of PVC | 411 |
| | <i>Jason Leadbitter</i> | |
| 8.6.1 | Introduction | 411 |
| 8.6.2 | How is PVC Manufactured? | 412 |
| 8.6.3 | PVC Compounding | 413 |
| 8.6.4 | PVC Applications in Use | 413 |
| 8.6.5 | Waste Hierarchy and End-of-Life Options | 414 |
| 8.6.6 | How to Go About Recycling of PVC? | 417 |
| 8.6.7 | The Dawn of a New Industry | 418 |
| 8.6.7.1 | VinylPlus® | 419 |
| 8.6.7.2 | Recovinyl® | 419 |
| 8.6.7.3 | Successes of the VinylPlus Initiative – European Recycled PVC Market Size | 421 |
| 8.6.8 | European Markets for Recycled PVC | 422 |
| 8.6.9 | The Recyclability of PVC | 422 |
| 8.6.10 | Legacy Additives and Regulatory Issues | 424 |
| 8.6.10.1 | Lead Stabilizers | 424 |
| 8.6.10.2 | Low Molecular Weight Orthophthalate Plasticizers .. | 425 |
| 8.6.11 | Benefits of PVC Recycling from a Life Cycle Perspective | 425 |
| 8.7 | Compatibilization of Blends for Mechanical Recycling | 426 |
| | <i>Norbert Nießner, Bianca Wilhelmus</i> | |
| 8.7.1 | Classification of Polymer Blends | 426 |
| 8.7.2 | General Principle of Compatibilizers | 428 |
| 8.7.3 | Selected Examples of Compatibilized Blends | 429 |
| 8.7.4 | Compatibilization in Mechanical Recycling | 431 |
| 9 | Chemical Recycling | 435 |
| 9.1 | Basic Principles | 435 |
| 9.1.1 | An Overview of Major Recycling Technologies | 435 |
| | <i>Bianca Wilhelmus</i> | |
| 9.1.1.1 | Introduction | 435 |

| | | |
|-----------|---|-----|
| 9.1.1.2 | Technologies | 438 |
| 9.1.1.3 | Historical Overview of Thermolytic Processes | 439 |
| 9.1.1.4 | Recent Approaches for Pyrolysis and Gasification ... | 446 |
| 9.1.1.5 | Solvolytic Processes | 451 |
| 9.1.1.5.1 | Polyethylene Terephthalate | 451 |
| 9.1.1.5.2 | Polyurethanes | 454 |
| 9.1.1.5.3 | Polyamides | 455 |
| 9.1.1.5.4 | Polycarbonate | 455 |
| 9.1.1.6 | Outlook | 455 |
| 9.1.2 | Petrochemical Feedstock Recycling | 463 |
| | <i>Dieter Staf</i> | |
| 9.1.2.1 | Waste & Recycling | 464 |
| 9.1.2.2 | The Waste-to-Chemicals Process Chain | 468 |
| 9.1.2.3 | Upgrading and Use of Pyrolysis Oil as Petrochemical Feedstock | 470 |
| 9.1.2.4 | Decentralized Versus Centralized Chemical Recycling | 472 |
| 9.1.2.5 | The Status of Petrochemical Feedstock Recycling ... | 473 |
| 9.1.3 | Plastic Recycling by Depolymerization | 474 |
| | <i>Achim Schmidt-Rodenkirchen, Stephan Aschauer, Thorsten Gerdes, Norbert Nießner</i> | |
| 9.1.3.1 | Introduction | 474 |
| 9.1.3.2 | Design Issues for Fluidized-Bed Reactors | 476 |
| 9.1.3.2.1 | Thermodynamics | 476 |
| 9.1.3.2.2 | Kinetics | 477 |
| 9.1.3.3 | Fluidized-Bed Reactor Technology | 479 |
| 9.1.3.3.1 | Physical Basics | 480 |
| 9.1.3.3.2 | Technical Design | 485 |
| 9.1.3.3.3 | Raw Gas Treatment | 488 |
| 9.1.3.3.4 | Scale-Up | 492 |
| 9.1.3.3.5 | Industrial Applications of Fluidized Beds in Plastic Recycling | 494 |
| 9.2 | Chemical Recycling of Polyolefins | 499 |
| | <i>Adrian Griffiths, Alejandro Sánchez, Stephanie Loo</i> | |
| 9.2.1 | Introduction | 499 |
| 9.2.2 | Basic Technical Principle | 500 |
| 9.2.3 | Examples | 501 |
| 9.2.4 | Products: Pyrolysis Oils | 503 |
| 9.2.5 | Applications | 510 |
| 9.2.6 | Market | 512 |
| 9.2.6.1 | Capacity | 512 |

| | | |
|-----------|---|-----|
| 9.2.6.2 | Cost | 514 |
| 9.2.6.3 | Collaborators | 517 |
| 9.2.6.4 | Circularity | 518 |
| 9.2.6.5 | Carbon Reduction | 520 |
| 9.2.7 | Conclusion | 522 |
| 9.3 | Chemical Recycling of PET | 525 |
| | <i>Carsten Eichert, Vitalij Salikov, Stephan Scholl</i> | |
| 9.3.1 | Introduction | 525 |
| 9.3.2 | Overview: Options for Recycling of Feed Materials | 526 |
| 9.3.3 | Chemical Recycling and its Relevance for PET | 529 |
| 9.3.3.1 | Pyrolysis | 529 |
| 9.3.3.2 | Chemical Depolymerization | 530 |
| 9.3.4 | PET Monomers | 532 |
| 9.3.5 | Monomer Recycling of PET | 534 |
| 9.3.5.1 | Methanolysis | 535 |
| 9.3.5.2 | Glycolysis | 535 |
| 9.3.5.3 | Hydrolysis | 536 |
| 9.4 | Chemical Recycling of Polystyrene | 544 |
| | <i>Norbert Nießner, Achim Schmidt-Rodenkirchen</i> | |
| 9.4.1 | Introduction | 544 |
| 9.4.2 | Overview and Challenges | 544 |
| 9.4.3 | Laboratory Pre-Trials | 547 |
| 9.4.4 | Trials in the Fluid Bed Reactor (InVerTec) | 549 |
| 9.4.5 | Trials with PS and Impurities | 552 |
| 9.4.6 | Conclusion | 555 |
| 9.5 | Chemical Recycling of Engineering Thermoplastics | 556 |
| | <i>Hannah Mangold, Caroline Beyer</i> | |
| 9.5.1 | Introduction: Market Size and Recycling Challenge | 556 |
| 9.5.2 | Overview of Chemical Recycling Processes | 558 |
| 9.5.2.1 | Polyamides (PA) | 558 |
| 9.5.2.1.1 | Polyamide 6 (PA6) | 558 |
| 9.5.2.1.2 | Polyamide 66 (PA66) | 562 |
| 9.5.2.2 | Polyurethanes (PUs) | 567 |
| 9.5.2.2.1 | Hydrolysis and Alcoholyisis | 569 |
| 9.5.2.2.2 | Aminolysis | 569 |
| 9.5.2.2.3 | Phosphorolysis | 570 |
| 9.5.2.2.4 | Glycolysis | 570 |
| 9.5.2.2.5 | Thermochemical Recycling | 571 |
| 9.5.2.3 | Polybutylene Terephthalate (PBT) | 571 |
| 9.5.2.4 | Other Engineering Plastics | 572 |
| 9.5.3 | Applications of Major Recycled Engineering Plastics | 572 |

| | | |
|------------|---|------------|
| 9.6 | Chemical Recycling of PTFE (as a Model for Other Polymers) | 577 |
| | <i>Achim Schmidt-Rodenkirchen, Klaus Hintzer, Thorsten Gerdes</i> | |
| 9.6.1 | Introduction | 577 |
| 9.6.2 | Manufacturing Process for PTFE and Other Perfluorinated Polymers | 579 |
| 9.6.3 | Mechanism of PTFE Depolymerization | 581 |
| 9.6.4 | Recycling PTFE and Perfluorinated Polymer Materials | 583 |
| 9.6.4.1 | PTFE Production Waste | 583 |
| 9.6.4.2 | PTFE Composites Production Waste | 584 |
| 9.6.4.3 | Perfluorinated Thermoplasts Production Waste | 584 |
| 9.6.4.4 | End-of-Life (EOL) PTFE and Perfluorinated Materials | 584 |
| 9.6.5 | Recycling Concepts for Perfluorinated Materials | 585 |
| 9.6.5.1 | Thermal Recycling | 586 |
| 9.6.5.2 | Mechanical Recycling | 586 |
| 9.6.5.3 | Chemical Recycling of Perfluorinated Polymers | 587 |
| 9.6.6 | Environmental Aspects of the Presented Process | 591 |
| 10 | Dissolution | 595 |
| | <i>Andreas Mäurer, Martin Schlummer</i> | |
| 10.1 | Classification of Polymer Recycling by Dissolution | 595 |
| 10.2 | Solvent Selection | 596 |
| 10.3 | Unit Operations | 598 |
| 10.3.1 | Dissolution | 599 |
| 10.3.2 | Cleaning | 600 |
| 10.3.3 | Precipitation | 601 |
| 10.3.4 | Drying and Solvent Recovery | 601 |
| 10.4 | Dissolution Technologies in Circular Value Chains | 602 |
| 10.4.1 | Waste Streams Suggested for Dissolution in the Literature | 602 |
| 10.4.2 | High-Level Applicability of Recycled Materials | 603 |
| 10.4.3 | Industrial-Scale Dissolution Processes | 604 |
| 11 | Thermochemical Processes | 609 |
| | <i>Dieter Stapf</i> | |
| 11.1 | Challenges and Approaches | 610 |
| 11.1.1 | Plastic Waste | 610 |
| 11.1.2 | Process Parameters | 612 |
| 11.1.3 | Flexible Thermochemical Technologies and Technology Readiness | 612 |
| 11.2 | Gasification for Chemical Recycling as Petrochemical Feedstock | 614 |
| 11.2.1 | Process and Technologies | 615 |

| | | |
|----------------------------------|---|------------|
| 11.2.2 | Syngas Upgrading – Cleaning of the Raw Synthesis Gas | 617 |
| 11.2.3 | Large-Scale, High-TRL Gasification Applications for Chemical Recycling | 618 |
| 11.2.4 | Balancing of a Gasification-Based Waste-to-Chemicals Process Chain | 620 |
| 11.3 | Pyrolysis for Chemical Recycling as Petrochemical Feedstock | 622 |
| 11.3.1 | Balancing of a Pyrolysis-Based Waste-to-Chemicals Process Chain | 622 |
| 11.3.2 | Process and Technologies | 626 |
| 11.3.3 | Large-Scale High-TRL Pyrolysis Applications for Chemical Recycling | 629 |
| 11.4 | Outlook | 630 |
| 12 | Recycling of Composites | 633 |
| | <i>Mathias Mühlbacher, Volker Altstädt</i> | |
| 12.1 | Introduction to Composites | 633 |
| 12.2 | The Composites Market | 636 |
| 12.3 | Composite Manufacturing | 639 |
| 12.4 | Challenges and Aims for Composite Recycling | 642 |
| 12.5 | Routes for Composite Recycling | 644 |
| 12.6 | Composite Recycling for the Wind Energy Sector | 647 |
| 12.7 | Composite Recycling for Automotive | 649 |
| PART C: Value Chain | 653 | |
| 13 | Comparison of Global Recycling Processes | 655 |
| | <i>Raphael Kiesel</i> | |
| 13.1 | Europe | 658 |
| 13.2 | North America | 663 |
| 13.2.1 | USA | 664 |
| 13.2.2 | Canada | 667 |
| 13.3 | Asia | 669 |
| 13.3.1 | China | 669 |
| 13.3.2 | India | 673 |
| 13.3.3 | Japan | 673 |
| 13.3.4 | Other Asian Countries | 674 |
| 13.4 | Conclusion & Summary | 675 |

| | |

| <i>Jürgen Epham, Arne Köhne</i> | |
| 14.1 Waste: Sources and Origins | 679 |
| 14.2 Collection and Sorting | 686 |
| 14.3 Recycling | 689 |
| 15 Recycling Value Chain and Detection/Purification Technologies | 697 |
| <i>Jürgen Priesters</i> | |
| 15.1 Introduction | 697 |
| 15.2 Recycling Value Chain | 697 |
| 15.3 Marine Litter | 699 |
| 15.4 Waste Management Systems and Materials | 700 |
| 15.4.1 Bulky Waste | 705 |
| 15.4.2 Commercial and Industrial Waste | 706 |
| 15.4.3 Municipal Waste | 707 |
| 15.4.4 Organic Waste | 709 |
| 15.4.5 Packaging Waste | 710 |
| 15.4.6 Paper Recovery | 712 |
| 15.4.7 Polymer Recovery – Upgrading and Recycling | 712 |
| 15.5 The Technologies | 717 |
| 15.6 Example: Ultimate Pure Sorting of Polystyrene | 719 |
| 16 Reuse | 721 |
| <i>Josefa Nüßlein, Thomas Neumeyer</i> | |
| 16.1 Introduction | 721 |
| 16.1.1 Definition of Reuse | 721 |
| 16.1.2 Types of Reuse | 723 |
| 16.2 Examples | 724 |
| 16.2.1 Life Cycle Extension | 724 |
| 16.2.2 Relocation | 725 |
| 16.2.3 Remanufacturing | 727 |
| 16.2.4 Component Reuse | 731 |
| 16.2.5 Alternative Component Reuse | 733 |
| 16.2.6 Reform | 734 |
| 16.3 Environmental Impact of Reuse | 735 |
| 16.4 Consumer Behavior | 738 |
| 16.5 Conclusion | 740 |

| | |
|---|------------|
| PART D: Design for Recycling | 745 |
| 17 Design for Recycling | 747 |
| <i>Robin Fachtan, Volker Altstädt</i> | |
| 17.1 Introduction | 747 |
| 17.2 Overview of Design for Recycling | 752 |
| 17.3 General Design Strategies | 754 |
| 17.4 Design for Recycling by Industrial Sector – Strategies and Recent Developments | 756 |
| 17.4.1 Packaging Industry | 756 |
| 17.4.2 Transportation | 762 |
| 17.4.2.1 Automotive Industry | 762 |
| 17.4.2.2 Aviation Industry | 770 |
| 17.4.3 Electronics | 772 |
| 17.4.4 Building and Construction | 776 |
| 17.5 Conclusion | 779 |
| PART E: Future Trends and Developments | 785 |
| 18 Future Trends | 787 |
| <i>Holger Ruckdäschel, Tobias Standau</i> | |
| 18.1 Thinking in Closed Loops at Every Stage | 788 |
| 18.2 Design and Material Selection Stage | 789 |
| 18.3 Usage Stage | 793 |
| 18.4 End-of-Life Stage | 796 |
| 18.5 Recycling Stage | 798 |
| 18.6 Circular Economy and New Business Models | 799 |
| 19 Future Developments | 803 |
| <i>Achim Schmiemann, Eric Homey</i> | |
| 19.1 The Thinning Effect | 805 |
| 19.2 Prediction of Properties | 807 |
| 19.3 Digitization in Processing Technology | 808 |
| 19.3.1 Tracer-Based Sorting | 811 |
| 19.3.2 Black-Black Sorting | 812 |
| 19.3.3 MFI Sorting | 812 |
| 19.4 3D Printing | 814 |
| Index | 825 |
