

Part I General Part

1	Preliminary Remarks	3
1.1	Scientific Ecology	5
1.2	Importance of Systematics and Taxonomy for Biology	6
1.3	Importance of Scientific Documentation (e.g. in Museums)	6
1.4	Importance of Excursions for Young Scientists	7
	References	7
2	Part A: Ecological Basics (Autecology)	9
2.1	Ecological Factors	11
2.1.1	Radiation, Light	11
	Radiation and Plant	12
	Absorption of Radiation Through the Leaves	12
2.1.2	Temperature, Frost, Heat	13
2.1.3	Water	16
	Global Water Supply	16
	Water Balance Types and Drought Resistance	16
	Soil Water	16
	Water State of the Cell	17
	Xerophytes	19
2.1.4	Chemical Factors and the Soil	22
	Nutrients and Trace Elements, Mineral Supply	22
	Salt: Halophytes and Salt Soils, Halobiomes	26
2.1.5	Mechanical Factors	31
	Wind, Trampling	31
	Fire	32
2.2	The Climate	34
2.2.1	General Questions	34
2.2.2	The Radiation Budget and Astronomical Basics	35
2.2.3	The Heat Balance	39
2.2.4	The Water Balance	42
2.2.5	The Earth's Eco-Climates (Climate Classification)	46
2.2.6	Climate Representation: Thermo-Isopleth Diagrams, Ecological Climate Diagrams	48
	References	55
3	Part B: Ecological Basis (Synecology)	57
3.1	Environment and Competition	59
3.2	Pollination and Fertilization (Flowers, Seeds, Fruits)	61
3.3	Dispersal and Distribution	62
3.4	Ecotypes and Biotope Change	63

3.5	The Historical Dimension	64
3.6	Coevolution and Symbioses	67
3.7	Population Ecology	69
3.8	Biodiversity	70
3.8.1	The Uneven Global Distribution of Biodiversity	71
3.8.2	On the Value of Threatened Diversity	74
3.9	Zonal, Azonal and Extrazonal Vegetation	76
	References	78
4	Part C: Ecological Systems and Ecosystem Biology	81
4.1	Geo-Biosphere and Hydro-Biosphere	83
4.2	The Hydro-Biosphere	83
4.3	Division of the Geo-Biosphere into Zonobiomes	84
4.4	Zonoecotone	85
4.5	Ecological Systems	86
4.6	Orobiomes and Pedobiomes	87
4.7	Biome	89
4.8	Small Units of the Ecological System: Biogeocenes and Synusia	89
4.9	Ecosystem Biology and the Nature of Ecosystems	91
4.10	Highly Productive Ecosystems	99
4.11	Peculiarities of the Material Cycles of Different Ecosystems	100
4.12	The Importance of Fire for Ecosystems	101
4.13	The Individual Zonobiomes and Their Distribution	104
	References	107
 Part II Special Part		
5	Part D: ZB I—Zonobiome of the Evergreen Tropical Rainforest or of the Equatorial Humid Diurnal Climate	111
5.1	Typical Features of the Climate in ZB I	113
5.2	Soils and Pedobiomes	115
5.3	Vegetation	117
5.3.1	Structure of the Tree Layer, Flowering Periodicity	117
5.3.2	Mosaic Structure of the Habitats	123
5.3.3	Herb Layer	124
5.3.4	Lianas	125
5.3.5	Epiphytes, Hemi-Epiphytes and Strangler	128
5.3.6	Epiphyllic Plants	133
5.3.7	Biodiversity	133
5.4	Different Types of Vegetation in Zonobiome I Around the Equator	136
5.5	Orobiome I: Tropical Mountains with Diurnal Climate	141
5.5.1	Forest Belt	141
5.5.2	Forest Line	146
5.5.3	Andine (Alpine) Belt	148
5.6	The Biogeocoenes of the Zonobiome I as Ecosystems	154
5.7	Fauna and Food Chains in the Zonobiome I	155
5.8	Man in the Zonobiome I	156
5.9	Zonoecotone I/II: Semi-Evergreen Forest-Thorn Savannah	158
	References	164
6	Part E: ZB II: Zonobiome of Savannahs, Deciduous Forests and Grasslands of the Tropical Summer Rainfall Area	165
6.1	General	167
6.2	Climate, Soils and Zonal Vegetation	167

6.3	Savannahs (Trees and Grasses)	173
6.4	Park Landscapes	183
6.5	Examples of Large Savannah Areas	185
6.5.1	Llanos on the Orinoco	185
6.5.2	Campos Cerrados	188
6.5.3	The Chaco Area	189
6.5.4	Savannahs and Park Landscapes of East Africa	189
6.5.5	Monsoon Forests in India	190
6.5.6	Vegetation of the Australian ZB II	194
6.6	Ecosystem Research: Examples	194
6.6.1	The Lamto Savannah	194
6.6.2	The Animal World	195
6.7	Tropical Hydrobiomes in ZB I and ZB II	197
6.8	Mangroves as Halo-Helobiomes in ZB I and ZB II	197
6.9	Shore Formations: Psammobiome	201
6.10	Orobiome II: Tropical Mountains with an Annual Temperature Cycle	203
6.11	Man in the Savannah	207
6.12	Zonoecotone II/III	207
6.12.1	Sahel	207
6.12.2	Thar or Sind Desert	207
6.12.3	The Caatinga	211
6.12.4	Tropical East Africa	211
6.12.5	SW Madagascar	211
	References	218
7	Part F: ZB III: Zonobiome of Hot Deserts or Subtropical Arid Climate	219
7.1	Climatic Subzonobiomes	223
7.2	Soils and their Water Balance	225
7.3	Substrate Dependent Desert Types	227
7.3.1	The Stone Desert (Hamada)	227
7.3.2	The Gravel Desert (Serir or Reg)	228
7.3.3	Sand Desert (Erg or Areg)	228
7.3.4	The Dry Valleys (Wadis or Oueds)	228
7.3.5	Pans (Sabkhas, Dayas or Schotts) and Takyr	230
7.3.6	Oases	230
7.4	Water Supply for Desert Plants	231
7.5	Ecological Types of Desert Plants	233
7.6	Productivity of Desert Vegetation	235
7.7	Desert Vegetation in the Different Floral Kingdoms	236
7.7.1	Sahara	236
7.7.2	Negev and the Sinai	238
7.7.3	Arabian Peninsula	238
7.7.4	Sonora	239
7.7.5	Australian Deserts	241
7.7.6	Namib and Karoo	244
7.7.7	Atacama	254
7.8	Orobiome III: The Desert Mountains of the Subtropics	257
7.9	Man in the Desert	257
7.10	The Zonoecotone III/IV: The Semi-Deserts	258
	References	261

8	Part G: ZB IV—Zonobiome of Sclerophyllic Woodlands Mediterranean	
	Winter Rain Areas	263
8.1	General, Climate, Soils	267
8.2	Origin of Zonobiome IV and Their Relations to Zonobiome V	269
8.3	The Mediterranean Area	270
8.4	Importance of Sclerophylly in Competition	275
8.5	Arid Mediterranean Subzonobiome, N Africa, Anatolia, Iran	276
8.6	California and Neighbouring Regions	277
8.7	Central Chilean Winter Rain Region with the Zonoecotones	280
8.8	The Cape Province in South Africa	283
8.9	SW and S Australia	290
8.10	Mediterranean Orobiome	294
8.11	Climate and Vegetation of the Canary Islands	296
8.12	Afghanistan at the Eastern Edge of the Winter Rain Zone	302
8.12.1	Irano-Turanian Floral Elements	303
8.12.2	Sino-Japanese Floral Elements	304
8.12.3	Saharo-Sindian and Other Floral Elements in Afghanistan	304
8.12.4	Floristic Elements of the Afghan High Mountains	309
8.13	Man in the Mediterranean	313
	References	319
9	Part H: ZB V—Zonobiome of the Laurel Forests or of the Warm Temperate	
	Humid Climate	321
9.1	General, Climate, Soils	326
9.2	Tertiary Forests, Lauriphyllly and Sclerophylly	328
9.3	Subzonobiome on the Western Sides of the Continents	329
9.3.1	North America, Forests with Giant Conifers	329
9.3.2	Valdivian Rainforest in Southern Chile	331
9.3.3	Western Australia	331
9.3.4	Western Europe	333
9.3.5	The Colchis and Hyrcania	333
9.4	Humid Subzonobiome on the Eastern Sides of the Continents	335
9.4.1	East Asia, China, Japan	335
9.4.2	Southeastern North America	337
9.4.3	Araucaria Forests of Southeast Brazil	337
9.4.4	South Africa	338
9.4.5	Biomes of <i>Eucalyptus-Nothofagus</i> forests in South-eastern Australia and Tasmania	339
9.4.6	Warm Temperate Biomes of New Zealand	340
	References	346
10	Part I: ZB VI—Zonobiome of Winter Bare Deciduous Forests or Temperate	
	Nemoral Climate	347
10.1	Leaf Shedding as an Adaptation to the Winter Cold	351
10.2	Importance of Winter Cold for Species of the Nemoral Zone	352
10.3	Distribution of the Zonobiome VI	353
10.4	Atlantic Heaths	353
10.5	The Deciduous Forest as an Ecosystem	358
10.5.1	General	358
10.5.2	The Beech Forest in the Solling as an Ecosystem	364
10.5.3	Ecophysiology of the Tree Layer	367
10.5.4	Ecophysiology of the Herb Layer (Synusiae)	371
10.5.5	Water Balance	374
10.5.6	The Long Cycle (Consumers)	376

10.5.7	Decomposers in Litter and Soil	378
10.5.8	Solling Ecosystem	380
10.6	Orobiome VI: The Northern Alps and the Alpine Forest and Tree Line . .	381
10.6.1	The Elevational Belts	381
10.6.2	The Forest Belts	382
10.6.3	Alpine and Nival Belts	385
10.7	Zonocotone VI/VII: Forest-Steppe	389
	References	394
11	Part J: ZB VII—Zonobiome of Steppes and Cold Deserts or of Arid Temperate Climate	395
11.1	Climate	399
11.2	Soils of the Steppe Zone of Eastern Europe	399
11.3	Meadow Steppes on Mighty Chernozem and the Feather Grass Steppes . .	402
11.4	North American Prairie	404
11.5	Ecophysiology of Steppe and Prairie Species	408
11.6	Asian Steppes	410
11.7	Wildlife of the Steppes	410
11.8	Steppes of the Southern Hemisphere	411
11.9	Sub-Zonobiome of the Semi-Deserts	413
11.9.1	Distribution	413
11.9.2	Vegetation in Afghanistan	417
	<i>Calligonum-Stipagrostis</i> Communities of Sandy Deserts (Fig. 8.57: 1a)	417
	<i>Haloxylon Salicornicum</i> Communities in Gravel Deserts (Fig. 8.57: 1b)	418
	Other Shrubby and Semi-Shrubby Chenopodiaceous Deserts and Semi-Deserts (Fig. 8.57: 1c)	418
	Ephemeral Semi-Desert on Loess Soils (Fig. 8.57: 1d)	418
	Shrubby <i>Amygdalus Semi-Desert</i> (Fig. 8.57: 1e)	418
11.10	Subzonobiome of the Central Asian Deserts	419
11.11	The Karakum Sand Desert	423
11.12	The Aralkum Desert	425
11.13	Orobiome VII (rIII) in Middle Asia	427
11.13.1	Tien Shan	427
11.13.2	The High Mountains of Afghanistan	428
	Alpine Semi-Deserts, Steppes and Meadows (Fig. 8.59: 7b) . . .	430
	Nival Belt (Fig. 8.59:8)	430
	Ecophysiological Data from Afghan Mountains	431
11.14	Subzonobiome of the Central Asian Deserts	432
11.15	Subzonobiome of the Cold High Plateau Deserts of Tibet and Pamir (sZB VII, tIX)	433
11.16	Man in the Steppe and Cold Desert	436
11.17	Zonocotone VI/VIII: Boreo-Nemoral Zone	436
	References	441
12	Part K: ZB VIII—Zonobiome of the Taiga or of the Cold Temperate Boreal Climate	443
12.1	Climate and Soils	448
12.2	The Coniferous Species of the Boreal Zone	448
12.3	The Oceanic Birch Forests in ZB VIII	450
12.4	The European Boreal Forest Zone	452
12.5	On the Ecology of the Coniferous Forest	452

12.6	The Siberian Taiga	456
12.7	Extreme Continental Larch Forests of Eastern Siberia with Thermokarst Phenomena	457
12.8	Orobiome VIII: Mountain Tundra	461
12.9	Mire Types of the Boreal Zone (Peinohelobiome)	461
12.9.1	Ecology of Raised Bogs	465
12.9.2	The West Siberian Lowlands, the Largest Marshland on Earth	467
12.10	Man in the Taiga	469
12.11	Zonoecotone VIII/IX (Forest Tundra) and the Polar Forest and Tree Line	470
	References	476
13	Part L: ZB IX—Zonobiome of the Tundra, the Arctic Climate	477
13.1	Climate and Soils	481
13.2	The Vegetation of the Tundra	482
13.3	Ecophysiological Investigations	482
13.4	Wildlife of the Arctic Tundra	483
13.5	Man in the Tundra	484
13.6	Arctic Cold Desert and the Solifluction	485
13.7	Antarctica and Subantarctic Islands	486
	References	492
14	Part M: Summary, Conclusions	493
14.1	Phytomass and Primary Production of the Individual Vegetation Zones and the Entire Biosphere	497
14.2	Conclusions from an Ecological Point of View	499
14.3	The Population Explosion	500
14.4	The Overtechnification	501
14.5	Sustainable Land Use	504
14.6	Confessions	507
