

Contents

We deeply acknowledge — V

Chapter 1

Introduction — 1

- 1.1 Overview — 1
- 1.2 Ceramic/ceramic SRC — 2
- 1.3 Metal/metal SRC — 3
- 1.4 Carbon/carbon SRC or all carbon composites — 4
- 1.5 Self-reinforced polymer composites — 5
- 1.6 Major features of SRPCs — 6
- 1.7 Economic background — 7
- 1.8 Applications — 8
- References — 9

Chapter 2

Raw materials — 11

- 2.1 Polyethylene — 11
 - 2.1.1 Types of polyethylene — 11
 - 2.1.2 Synthesis of PE — 16
- 2.2 Polypropylene — 20
 - 2.2.1 Types — 21
 - 2.2.2 Other types of PP — 21
 - 2.2.3 Synthesis of PP — 23
- 2.3 Nylon — 26
 - 2.3.1 Types of nylon — 26
 - 2.3.2 Synthesis of nylon — 27
- 2.4 Polyester — 29
 - 2.4.1 Types of PET — 30
 - 2.4.2 Synthesis of polyester — 30
- 2.5 Polymethylmethacrylate (PMMA) — 32
- 2.5.1 Synthesis — 32
- 2.6 Polylactic acid or polylactide (PLA) — 33
- References — 38

Chapter 3

Polymer self-reinforced composites – a review — 39

- 3.1 PE-based SRC — 39**
- 3.2 PP-based SRC — 42**
- 3.3 PA-based SRC — 45**
- 3.4 Some other popular SRCs — 46**
- References — 47**

Chapter 4

Carbon/carbon and ceramic self-reinforced composites — 50

- 4.1 Carbon–carbon composites — 50**
 - 4.1.1 Fabrication — 51**
 - 4.1.2 Properties — 52**
 - 4.1.3 Silicon carbide self-reinforced composites — 52**
 - 4.1.4 Applications — 52**
- 4.2 Ceramic SRCs — 54**
 - 4.2.1 Ceramic self-reinforced composites — 54**
 - 4.2.2 Silicon nitride/barium aluminosilicate composites — 55**
 - 4.2.3 Ca-hexaaluminate/alumina composite — 56**
 - 4.2.4 Aluminium matrix/ Al_2O_3 composite — 57**
- References — 59**

Chapter 5

Processing and manufacturing self-reinforced polymer composites — 60

- 5.1 Processing conditions — 60**
 - 5.1.1 Tacticity — 61**
 - 5.1.2 Polymorphism — 61**
 - 5.1.3 Molecular structure — 61**
 - 5.1.4 Molecular weight — 61**
 - 5.1.5 Copolymerization — 62**
 - 5.1.6 Heat treatment criteria — 62**
 - 5.1.7 Nucleation — 62**
- 5.2 Processing methods — 62**
 - 5.2.1 Hot compaction — 63**
 - 5.2.2 Overheating — 63**
 - 5.2.3 Film stacking — 64**
 - 5.2.4 Co-extrusion — 64**
 - 5.2.5 Compression moulding — 65**
 - 5.2.6 Injection moulding — 66**
 - 5.2.7 Filament winding — 68**
 - 5.2.8 Laser-assisted tape winding — 69**
 - 5.2.9 Melt compounding — 69**

- 5.2.10 Impregnation — 70
- 5.2.11 Powder impregnation — 71
- 5.2.12 Additive manufacturing — 71
- References — 71

Chapter 6

Characterization of self-reinforced polymer composites — 73

- 6.1 Microscopic characterization — 73
 - 6.1.1 Optical microscopy — 74
 - 6.1.2 Scanning electron microscopy (SEM) — 75
 - 6.1.3 Transmission electron microscopy (TEM) — 76
- 6.2 X-ray spectroscopy and crystallographic methods — 76
- 6.3 Fourier-transform infrared spectroscopy (FT-IR) — 78
- 6.4 Thermal characterization — 79
 - 6.4.1 Differential scanning calorimetry (DSC) and thermogravimetric analysis (TGA) — 79
 - 6.4.2 Dynamic mechanical (thermal) analysis — 79
- 6.5 Acoustic methods — 80
 - 6.5.1 Through transmission C-scan — 80
- References — 81

Chapter 7

Interfacial mechanics of self-reinforced polymer composites — 82

- 7.1 Micromechanics of stress transfer through the interface — 82
- 7.2 Mechanical test methods to evaluate interface properties — 83
- 7.3 Meso-mechanical multiple fibre pull-out test — 86
- References — 92

Chapter 8

Performance of self-reinforced polymer composites — 95

- 8.1 Quasi-static properties — 95
 - 8.1.1 Tensile properties — 95
 - 8.1.2 Compressive properties — 96
 - 8.1.3 Flexural properties — 98
 - 8.1.4 In-plane shear properties — 100
- 8.2 Fatigue properties — 104
- 8.3 Impact properties — 105
- 8.4 Creep — 106
- 8.5 Other properties — 107

- 8.5.1 Short beam test — **107**
- 8.5.2 Interlaminar shear strength tests — **107**
- 8.5.3 Notched plate test — **108**
- 8.5.4 Test method to evaluate fracture mechanics-related parameters — **108**
- 8.6 Environmental effects — **110**
- References — **111**

Chapter 9

Experimental fracture and failure analysis in SRCs — 112

- 9.1 Introduction — **112**
- 9.2 Fractography — **113**
- 9.3 Methods and instruments — **114**
- 9.4 Failure modes — **117**
 - 9.4.1 Fibre-centred failures — **117**
 - 9.4.2 Delamination centred failure — **120**
- References — **121**

Chapter 10

Self-reinforced polymer composites – global solutions and technological challenges! — 123

- References — **131**

Index — 133
