Acknowledgments — VII

About the Authors — IX

List of Figures — XV

Preface: Two Perspectives — XVII

Overview and Introduction — XXXVII

Chapter 1

Historical Sketches of Centralization Versus Decentralization — 1

From Hominids to Imperial China — 4

Prehistory of Information Technology — 4

Protocol Centralization in the Law — 7

China and Europe — 9

Psychological Centralization in China and Decentralization
in Europe — 9

Protocol Decentralization in China — 11

Political Centralization in China and Europe — 16

The Apaches Versus Bitcoin — 19

Maghribi Traders' Solution — 24

The Maghribis' Solution was Reputation — 26

The U.S. Constitution's Dynamic Hybrid Solution — 29

Chapter 2

Contemporary Decentralization — 36

From Social Media to Decentralized Coordination — 37

Sharing Economy — 41

History of Web 1.0 and Web 2.0 — 42

Open Source Culture — 45

P2P, Blockchains, and Web3 — 50

P2P Technology — 51

Blockchains — 53

Web3 — 55

New Tools: Hash Functions — 59

New Tools: Blockchain Protocols — 61

New Tools: Public-Key Cryptography and Zero-Knowledge Proofs — 65

Anonymity: Pros and Cons — 66

New Tools: Decentralized Smart Contracts — 68

Chapter 3

Future Decentralization — 72

Vision of Human-Centered, AI-Enabled Internet of Things — 72

Algorithmically Automated Control — 76

Decentralized Commerce — 79

Reputation Systems and Orwellian Nightmares — 82

The Old Versus the New — 87

 The Fallacy of Uniformitarianism and Chesterton's Fence — 88

Obstacles to Decentralization — 90

 The 2016 DAO — 91

 Path Dependencies — 93

 Overhead Institutions are Catalysts for the Economy — 95

 Summary — 98

Chapter 4

Technical Perspective — 100

Impossibility Results — 102

 Condorcet's Paradox — 102

 Arrow's Impossibility Theorem — 106

Folk Theorems of Game Theory — 107

 Prisoner's Dilemma — 108

 Repeated Prisoner's Dilemma — 110

 Repeated Prisoner's Dilemma with Precommitments — 110

 Infinite Variations of Prisoner's Dilemma — 111

 Zero-sum Games and Code-is-Law Smart Contracts — 114

 Application to PoS Consensus Algorithms — 115

 Application to Reputation Tokens — 117

How to Build a DAO — 119

Chapter 5

Eight Institutions — 125

Chapter 6

Reputation — 129

Web of Trust — 130

Inductive Argument for Reputation Architecture — 132

 Consequences of the Architecture — 134

 Security — 136

Dynamic Design Example — 138

Criticisms — 141

Summary — 142

Chapter 7**Governance — 144**

Decentralized Governance with New IT Tools — 149

Instability from Profit Motive and Rigid Rules — 151

Reputation Counters Instability from Profit Motive — 152

Dynamic Design Counters Instability from Rigid Rules — 154

Eight Qualities of Effective Decentralized Governance and Authentic
Deliberation — 161

Design Choices Match Values — 163

Connecting Values with Protocols — 164

Microdemocracy — 169

Summary — 174

Chapter 8**Finance — 176**

Banking and ZKRollups — 177

Underwriting: Insurance and Lending — 179

Tokenization — 180

Chit Fund Example — 181

Decentralized Architecture — 182

Trading Markets — 187

General Principles — 187

The Basic Financial Markets — 188

Regulation — 191

Stablecoins — 192

Basic Design — 194

Hot Money — 195

Stablecoin Design Choices — 197

Summary — 198

Chapter 9**Historiography — 200**

Oracles — 201

Condorcet's Jury Theorem — 202

SchellingCoin Protocol — 203

News and Education — 204

Open Source Culture Requires a Culture of Respect for History — 210

Review Gives Momentum — 211

Chapter 10

Transcendental Unifying Values — 215

Integrating Polar Values — 215

Universal Values from Science and Poetry — 224

Conclusion — 228

Diagnosis — 232

Bibliography — 239

Index — 249
