Introduction 2

Material and Methods 3

 Localities 3

 Material 3

 Character modules 5

 Determination of the relative individual age 7

 Morphometric analysis 7

Results 8

 Development of the frontoparietal during metamorphosis 8

 Frontoparietal in postmetamorphic development 9

 Notes on frontoparietal structure and its variation in adults 10

 Variation of frontoparietals in adults from Bechlejovice 10

 Interspecific variation of frontoparietals 10

 Development of the transverse processes (including ribs) 11

 Development of the synsacrum 12

 Variations of the synsacrum in adults 12

 Clustering character modules 13

 Morphometric evaluation 17

Systematic palaeontology 17

Palaeobatrachus Tschudi, 1838 17

Palaeobatrachus tobieni (Wuttke in Sanchiz, 1998) 19

Palaeobatrachus sp. 20

Palaeobatrachus gracilis Meyer, 1857 21

Palaeobatrachus novotnyi Špinar, 1972 22

Palaeobatrachus minutus sp. nov. 23

Palaeobatrachus bohemicus Meyer, 1860 24

Palaeobatrachus laubei Bieber, 1881 26

Palaeobatrachus luedeckei Wolterstorff, 1886 28

Palaeobatrachus diluvianus (Goldfuss, 1831a) 29

Palaeobatrachus grandipes (Giebel, 1851) 30

Palaeobatrachus gigas Meyer, 1852 31

Palaeobatrachus sp. 33

Palaeobatrachus robustus Hossini & Rage, 2000 34

Palaeobatrachus hauffianus (Fraas, 1909) 36

Palaeobatrachus hiri Venczel, 2004 37

Palaeobatrachus codreavlati sp. nov. 39

Palaeobatrachus eurydices Villa, Roček, Tschopp, van den Hoek Ostende & Delfino, 2016 40

Palaeobatrachus langhae (Fejérváry, 1917) 42

Discussion	45
Species diversity and anatomical evolution	45
Unresolved taxonomic problems	48
Palaeogeographic context	50
 Taxa removed from the list of valid species of <i>Palaeobatrachus</i>	 52
 Acknowledgements	 53
