Preface — V

List of Contributors — XI

Poernomo Gunawan and Ziyi Zhong

1 Nuncatalytic and catalytic oxidation of organic pollutants in wastewater by air — 1

- 1.1 Introduction — 1
- 1.2 Wet air oxidation — 3
- 1.3 Catalytic wet air oxidation — 8
 - 1.3.1 Metal oxide catalysts for CWAO — 9
 - 1.3.2 Supported noble metal catalysts for CWAO — 18
 - 1.3.3 Carbon-based catalysts for CWAO — 23
- 1.4 Catalyst deactivation — 28
- 1.5 Future outlook and challenges — 30
- References — 31

Shuangde Li and Yunfa Chen

2 Catalytic oxidation of volatile organic compounds — 41

- 2.1 Introduction — 41
 - 2.1.1 Definition of VOCs — 41
 - 2.1.2 Emission sources of VOCs — 41
 - 2.1.3 Environmental and health impact of VOCs — 42
 - 2.1.4 Purification of VOCs — 42
- 2.2 Synthetic methods for catalyst — 44
 - 2.2.1 Synthetic methods for supported noble catalyst — 44
 - 2.2.2 Synthetic methods for metal oxide catalysts — 45
- 2.3 VOC purification by supported noble metal nanostructures — 48
 - 2.3.1 Platinum (Pt)-based nanostructures — 48
 - 2.3.2 Palladium (Pd)-based nanostructures — 52
 - 2.3.3 Mixed noble metal catalysts — 55
- 2.4 Mixed metal oxide catalysts — 58
 - 2.4.1 Single metal oxide catalysts — 60
 - 2.4.2 Mixed metal oxide catalysts — 65
 - 2.4.3 Perovskite catalysts — 70
 - 2.4.4 LDH-derived mixed oxide catalysts — 75
- 2.5 Monolithic catalysts and application — 77
 - 2.5.1 Monolithic catalysts — 77
 - 2.5.2 Monolithic catalyst application — 80
- References — 82

Ubong Jerome Etim, Ziyi Zhong, Zifeng Yan and Peng Bai

3 Functional catalysts for catalytic removal of formaldehyde from air — 89

- 3.1 Introduction — 89
- 3.2 Formaldehyde — 91
 - 3.2.1 Physical properties, chemistry, and applications — 91
 - 3.2.2 Associated effects of formaldehyde on human health — 92
 - 3.2.3 Historical facts — 93
 - 3.2.4 Sources of formaldehyde in the environment — 94
- 3.3 Methods for removal of formaldehyde — 95
 - 3.3.1 Adsorption — 96
 - 3.3.2 Biological method — 97
 - 3.3.3 Membrane separation — 98
 - 3.3.4 Absorption — 98
 - 3.3.5 Source removal — 99
 - 3.3.6 Catalytic oxidation — 99
- 3.4 Formaldehyde oxidation catalysts — 100
 - 3.4.1 Oxidation mechanisms and kinetics — 100
 - 3.4.2 Noble metal-based catalysts — 105
 - 3.4.3 Transition metal oxide catalysts — 108
 - 3.4.4 Transition metal oxide composite catalysts — 111
 - 3.4.5 Catalyst support — 112
- 3.5 Factors affecting oxidation performance of catalysts — 113
 - 3.5.1 Catalyst factor — 114
 - 3.5.2 Catalyst deactivation — 114
 - 3.5.3 Presence of contaminants — 115
 - 3.5.4 Concentration — 116
 - 3.5.5 Temperature — 116
 - 3.5.6 Space velocity — 117
- 3.6 Conclusion — 117
- References — 118

Cheng Zhang, Yanshan Gao, Liang Huang and Qiang Wang

4 Recent advances in catalytic oxidation of NO to NO₂ — 127

- 4.1 Introduction — 127
- 4.2 NO oxidation mechanism and reaction equilibrium — 128
- 4.3 Pt-based catalysts — 132
 - 4.3.1 Effect of Pt particle size — 132
 - 4.3.2 Effect of support — 134
 - 4.3.3 Effect of promoter — 135
 - 4.3.4 Effect of alloying — 136
 - 4.3.5 The main issues toward commercial application — 139

4.4	Transition metal oxides-based catalysts —	139
4.4.1	Cobalt oxide-based catalysts —	139
4.4.2	Manganese oxide-based catalysts —	147
4.4.3	Chromium-based catalysts —	150
4.4.4	Copper-based catalysts —	155
4.4.5	Other metal oxides —	157
4.5	Perovskite-based catalysts —	158
4.6	Carbonaceous-based catalysts —	160
4.7	Zeolite-based catalysts —	161
4.8	Sulfur poisoning —	162
4.9	Practical applications of NO oxidation catalysts —	164
4.9.1	Practical applications in NSR —	164
4.9.2	Practical applications in SCR —	166
4.9.3	Practical applications in CRT —	168
4.10	Conclusions and remarks —	169
	References —	171

Qingling Liu and Mingyu Guo

5	Selective catalytic reduction of nitrogen oxides by NH_3 —	176
5.1	Introduction —	176
5.1.1	Overview of NO_x —	176
5.1.2	Emission sources of NO_x —	176
5.1.3	Hazard of NO_x —	177
5.1.4	Removal of NO_x —	177
5.2	The categories of the SCR catalysts —	181
5.2.1	Noble metal catalysts —	181
5.2.2	Zeolite molecular sieve —	181
5.2.3	Metal oxides catalysts —	185
5.3	Major issues for catalyst applications —	191
5.3.1	Low-temperature SCR performance —	191
5.3.2	SO_2 and H_2O resistance —	192
5.3.3	Hydrothermal aging and coking resistance —	195
5.3.4	Alkali metal resistance —	196
	References —	198

Jiang Wu and Fengguo Tian

6	Photocatalytic removal of gaseous elemental mercury —	203
6.1	Introduction —	204
6.2	Photocatalytic eliminating of elemental mercury —	205
6.2.1	The influence of surface heterojunction on photocatalytic removal of elemental mercury —	205

- 6.2.2 The influence of morphology on photocatalytic removal of elemental mercury — **210**
- 6.2.3 The influence of metal oxides with TiO₂ on photocatalytic removal of elemental mercury — **217**
- 6.3 Conclusion — **228**
References — **229**

Wen Xiao and Ziyi Zhong

- 7 Recovery of valuable metals from e-waste via applications of nanomaterials — 234**
 - 7.1 Introduction — **234**
 - 7.2 Processes of metal recovery from e-waste — **237**
 - 7.2.1 Pyrometallurgical processes — **237**
 - 7.2.2 Hydrometallurgical processes — **240**
 - 7.3 Conclusions — **256**
References — **257**

Index — 261
