## About the Authors

Guy Hart-Davis

is the author of several other computer books, including *iLife '09 Portable Genius*, *iWork '09 Portable Genius*, and *iMovie and iDVD '09 Portable Genius*.

Kate Binder

has been using Apple computers for more than 25 years — yes, that pre-dates the Mac! — and is starting to feel quite old. She still enjoys messing around with Macs, though, and does so at every opportunity. It's much more entertaining than doing actual work. When she can be found working, Kate's most likely to be doing magazine and book production, creating e-books for major publishers, or writing books like this one. She is the author or coauthor of other titles including *Teach Yourself Adobe Photoshop Elements 6 in 24 Hours*, *Easy Mac OS X Leopard*, *Sams Teach Yourself Adobe Photoshop CS3 in 24 Hours*, *Easy Adobe Photoshop Elements 4*, *Get Creative!: The Digital Photo Idea Book*, *SVG for Designers*, *Microsoft Office v.X for Mac Inside Out*, *The Complete Idiot's Guide to Mac OS X*, *Photoshop 6 Cookbook*, *PhotoImpact Solutions*, and *Sams Teach Yourself QuarkXPress 4 in 14 Days*. She lives in an old house in New Hampshire with her husband, journalist Don Fluckinger, accompanied by assorted children, dogs, cats, and (she's pretty sure) a mouse under the dryer.
