Acknowledgements

First, I would like to thank Prof. Dr. Bengt-Arne Wickström, who agreed to supervise this – in many ways – *different* thesis, who gave valuable input and helped improve the work, and who was patiently answering all my questions when it came to economic modeling. I also want to thank Prof. Dr. Nikolaus Wolf, my second referee, for always lending me his sympathetic ear when needed – he introduced me to a whole new world of economic history and data work, which did not only enrich this work, but also my understanding of the world in general. I want to thank the members of the examination board at Humboldt-Universität zu Berlin, Prof. Dr. Benjamin Fabian and Dr. Michele Gazzola, for their willingness to participate in the defense of this dissertation. Dr. Jens Barthel and I not only shared an office during the past years, but also experienced all ups and downs together a dissertation causes. He perhaps could not teach me as much about music, art, and comedy as he wanted to, but he taught me the most of what I know about economics and helped in so many ways that I cannot adequately express my gratitude. Dr. Franziska Lottmann took much of her time to read and criticize my work, which I appreciate very much. My colleagues Jan Hansen, Regina Kühne, Hannes Peinl, and Nannette Swed gave helpful feedback and listened to all my presentations without complaint. Maje Basten, Teresa Villapadierna, and Christina Wunderlich helped find books that were not easily available. Sonja Boden, Monica Ridgway, Richard Webster, and Ryan Weldzius corrected my verbal mistakes – for the remaining ones only I am responsible – I benefited greatly from their comments and knowledge of the English language. The employees of the *Statistikamt Nord* and the *Statistisches Bundesamt* put an enormous amount of work into finding the data for me, which exceeded all my expectations. Also, the employees of the *Norddeutscher Rundfunk* gave me the permission to use their sources. I want to thank Prof. Dr. Barbara Kavemann for introducing me to such a special topic, for all her recommendations, and advice. Furthermore, the members of the *Beirat*

des Bundesmodellprojektes Unterstützung des Ausstiegs aus der Prostitution, for showing me very different points of view and a great interest in my work.

Only very few people are as lucky as I am to have such a great family supporting me during my studies and work on this thesis. My grandparents always assured me how proud they are of what I do; my aunts, uncles, and cousins tirelessly listened to my complaints and cheered me up when needed. My sister and brother-in-law not only offered me a place to stay when I did research in Hamburg, but also cared for me during my visits. Without having this home away from home, I could not have finished my diploma thesis and especially not the thesis at hand. My mother and stepfather were as supportive as one wishes their parents to be. Raising two – certainly not easy – daughters all by herself, my mother has the biggest part in this work. We always knew that we could count on her no matter what and were unconditionally loved. A better basis cannot be provided for children. Last but not least, I want to thank Dr. Steffen Kunz – the man with whom I tirelessly discussed all my thoughts and doubts and experienced all my successes and defeats. His love and understanding was a constant companion for me and will never be forgotten.
