- James, Duke of York (later king James II), partner in slave trading company, 3
involvement with Dutch Wars, 9
- James I, king of England, 6
- James II, king of England, 14, 15
- Jeffreys, George, Lord Chief Justice *see* Monmouth's rebellion
- Jenifer, Daniel of St. Thomas, politician and commissioner for Maryland, 84
slave trader, 147
- Jersey Quadrant
Jonathan Sisson constructs for Eastern Division of New Jersey, 35
Rittenhouse uses for latitude of New Castle and Middle Point, 87
stored in Philadelphia State House—never seen again, 190
- Johnson, Sir William, first Baronet
Moravian Indians placed under care of during Paxton Boys insurrection, 92–93
negotiates with Six Nations for Mason and Dixon's survey to proceed beyond Alleghenies, 166, 174
superintendent of Indian Affairs, 89
- Jones, Thomas, Maryland commissioners' surveyor, 23
- Jumonville Affair, Washington's attack on de Villiers' column, 81
- Kennedy, Robert, Philadelphia printer of the Maps of the Lines, 194
- Lalande, Jérôme. French astronomer and mathematician
comments on Mason share of Longitude prize, 209–210
visits London; makes acquaintance of Charles Mason, 73–74
- Lancaster, Pennsylvania
Mason visits, 117
Paxton Boys attack on nearby Conestoga village, 89–90
latitude, degree of *see also* Mason and Dixon's meridian arc
correcting for error in estimates for West Line, 101, 106
a short history of, 239–242
latitude, explanation of, 229–230; *Figure 34*, 229
- Leeds, John, Justice of the Peace and scientist, commissioner for Maryland, 26, 84, 140

- le Monnier, Pierre-Charles, French astronomer, 68 *see also* Academie de Sciences
- levels, frames for carrying measuring rods
- accuracy of vs. chaining, 193, 243
 - Joel Bailey constructs for degree of latitude, 189–190
 - Loxley constructs for 15 mile south line, 102, 104
 - use on steep inclines 136, 158
- Lewis and Clark Expedition, 1803, uses Mason's lunar tables, 220
- L'Grand*, French frigate, encounter with HMS *Seahorse*, 52, 53
- Lind, Dr James, Scottish physician and polymath, 205–206
- Lloyd, Edward, merchant, planter, and politician, Maryland commissioner, 26
- Mason and Dixon's visit, 111
- Longitude Prize, act of queen Anne for, 17
- political divisions, 119
- longitude, explanation of, 228
- Lukens, Isaiah, astronomical clock for Philadelphia State House, 222
- Lukens, John, Surveyor General and commissioner for Pennsylvania
- compares lengths of brass standards with Charles Mason, 172
 - completes the border lines following Revolutionary War, 220
 - fixes position of Tangent Point, 29
 - observes 1769 transit of Venus from Norriton, 200
 - surveys Tangent Line, 28
- lunar distance method for finding longitude
- Charles Mason makes major improvements to tables of, 209, 217
 - Charles Mason tests concept on voyage to South Africa, 57
 - Nevil Maskelyne tests concept on sea voyages, 71, 116–117
- Macclesfield, George Parker, second Earl of, President of the Royal Society, 35, 41, 73, 109
- Malcolm, Reverend Alexander, minister and musicologist, commissioner for Maryland, 26
- Map of the Lines, definitive map of the borders
- commissioners require map engraved and printed, 193
 - Jeremiah Dixon draws the map, 187
 - problems with engraving, 193–194
 - signing by commissioners, 194
- Marcus Hook, Pennsylvania, first port of entry during colonial period, 82, 84
- Markham, William, deputy governor of the Province of Pennsylvania, 10
- Maryland
- becomes a royal province, 16
 - borders, changes to, 12, 13
 - dispute with Pennsylvania begins, 10
 - economy dependent on slave labor, 103
 - final change to northern border, 20
 - founding of, 7
 - restored to Baltimore family, 17
- Maskelyne, Nevil
- attempts to detect Attraction of Mountains on Saint Helena 204
 - candidature and appointment as Astronomer Royal, 116, 120
 - character and death, 216
 - early life and study under James Bradley 41–42; *Figure* 8, 43
 - endorses Mason and Dixon's proposal for measuring a degree

- of latitude; agrees to draw up instructions 160
- experiments with lunar distances on sea voyages, 71, 110
- designs improvements for zenith sector, 67, 69
- observations on Saint Helena 61
- recommended for 1761 transit of Venus observations, 43
- Schiehallion experiment; awarded Royal Society's Copley medal, 209
- Mason, Charles
 - acquaintance with Benjamin Franklin, 71
 - assistant to Astronomer Royal James Bradley, 45–46
 - assists Nevil Maskelyne on Saint Helena, 62
 - character of, 47
 - delivers paper to Royal Society, 71
 - dispatched to Ireland for 1769 transit of Venus, 198–199, and return journey 200
 - early years, 43–45; *Figure 9, 44*
 - emigration to America, and death, 209, 210, 211; *Figure 29, 212*
 - encounter with sheriff Samuel Smith, 118
 - explores country as far as New York, 120–122
 - explores the country as far as Williamsburg, meets “king of the Tuscarawa”, 144–148, *Figure 21, 146*
 - friendship with Jérôme Lalande, 74
 - journal of the American survey, 85
 - journal (log book) of voyage to and from South Africa, 57
 - marriage to and death of Rebekah, 46–47
 - records Hugh Crawford's account of Ohio country in his journal, 186
 - searches for suitable mountain in Scotland for Nevil Maskelyne's gravity experiment, (Schiehallion), 206–208
 - declines Royal Society's offer to perform, 208 *see also* Attraction of Mountains
 - supervises *Nautical Almanac* computers, 204
 - transit of Venus 1761, disagreement with Royal Society, 54–55
 - visit to Lancaster, Pennsylvania, 117
 - unsuccessfully petitions Board of Longitude for share of Longitude Prize, 209–210
- Mason and Dixon: 1761 transit of Venus expedition
 - dispute with Royal Society over location of, 54–56
 - encounter with French warship 52–54
 - engaged as observers for Royal Society, 49
 - observations at Cape Town, 57–61, *Figure 11, 59*
- Mason and Dixon: Pennsylvania/Maryland border surveys
 - commence work in Philadelphia, 91, 93
 - complete survey of North Line, 128–129, *Figure 20, 129*
 - establish latitude for West Line (Mason-Dixon Line), 99, 101, 104–107
 - eastern extension to Delaware River, 167
 - depart America for England, 195
 - depart England, 79–79
 - devise alternative method for running lines, 131
 - devise method for running lines, 123–124
 - first meeting with provincial commissioners, 82–84

- Mason and Dixon: Pennsylvania/
Maryland border surveys (*cont'd*)
interviewed for and appointed
74–75, 76
run and complete Tangent Line,
110–112, 113–114
run line west of Royal Proclamation
limit, 177
reach western limits of commission,
183–185
visit to Bushey Cavern, 137
- Mason and Dixon's meridian arc
complete measurements, 189–192
gravity observations, 167, 169–171
modified to a degree of latitude, 160
Nevil Maskelyne prepares
instructions for, 160
latitudes observations, 163–164
preliminary value, 174
proposal to measure degree of
longitude approved by Royal
Society, 120
results presented to Royal Society, 197
- Mason, Doctor Isaac, second son of
Charles Mason, 46, 210
- Mason, Mary *nee* Williams, second
wife of Charles Mason, 204,
213–214
- Mason, William, eldest son of Charles
Mason, 46
petitions Board of Longitude, 213
- Mason-Dixon Line *see* West Line
- McClean, Archibald, commissioner for
Pennsylvania, 28, 83
- McClean, Moses
cash flow problems, 151, 158, 187
Charles Mason stays at house of, 120
commissary to Mason and
Dixon, 109
mean time, 150, 221, 227
micrometer, description of, 49

- Delaware, Catfish visits Mason and
Dixon's camp, 182
- deputies appointed to accompany
Mason and Dixon, 175
- loyalties during French and Indian
War; Six Nations Indians
(Iroquois League), 81
- 1763 Royal Proclamation, Governor
Sharpe's concern for breaching,
156–157

- party visit Mason and Dixon's camp, 179
- post-French and Indian War tensions *see* Pontiac's Rebellion
- Prisqueetom visits Mason and Dixon's camp, 183–184
- Seneca, war party visit Mason and Dixon's camp, 182
- Six Nation's permission for survey to continue beyond sought, 166
- Nautical Almanac, 42
 - Charles Mason's computations for, 204
 - includes Charles Mason's "Places of the Moon" and star catalogue, 210
 - Nevil Maskelyne's priority as Astronomer Royal, 216
 - Nevil Maskelyne sends copy to Mason and Dixon in America, 172
- Navigation Acts, as a contributory cause for war with Netherlands, 8
- New Castle
 - site of Dutch Fort Casimir
 - circular border surveyed 1701, 16–17
 - circular border, decree of 1732, implementing rules, 20–21, 23, 25
 - as centre of 12-mile circular border, 1681, 10
 - William Penn lands at, 1682, 11
- New Jersey, founding of, 8
 - division of, 11
 - as a royal province, 34
- New York, border dispute with New Jersey, 34
 - Charles Mason visits, 121
 - Mason and Dixon depart America from, 195
 - Stamp Act Congress convenes at, 143
- Newton, Sir Isaac, English physicist, mathematician and alchemist, 72, 203, 241
- Norriton, Pennsylvania, home and observatory of David Rittenhouse, 93, 198, 200
- North Line, border between Maryland and the Three Lower Counties, 94
 - survey of, 128–129
- nutation, discovery by James Bradley, 38
 - explanation of, 226
- Ogle, Samuel, Governor of Maryland, 21
- Parsons, William, Pennsylvania commissioners' surveyor, 23
- Paxton Boys insurrection, murder of Conestoga Indians, 90–91, 92
 - march on Philadelphia, 99–100
- Penn, Admiral Sir William, monetary loan to king Charles II, 9
- Penn, Hannah, wife of William Penn, first proprietor of Pennsylvania, 17
- Penn, William, first proprietor of Pennsylvania
 - death, 17
 - difficulties with Pennsylvania's legislature, 16
 - petitions Duke of York for Three Lower Counties (Delaware); arrives in America, 1682, 11
 - royal grant of Pennsylvania; first dispute with Lord Baltimore, 9–10
 - supports referral to Crown to settle dispute with Lord Baltimore, 12

- Penn, Thomas, second proprietor of Pennsylvania
 agrees with Lord Baltimore to run temporary lines, 22
 disagreements with Lord Baltimore, 20
 learns of commissioners failure to establish Tangent Line, 73
 indenture to abide by 1732 agreement signed with Lord Baltimore 1760, 25
 instructs commissioners to cease use of Jersey Quadrant, 68
 meets Mason and Dixon in London, 74–75
 relationship with Pennsylvania's legislature, 31–32, 102, 113
 seeks expert advice and surveying instruments in London, 34, 66, 68
- Penn, John, nephew of Thomas Penn and governor of Pennsylvania
 issues warrants for arrest of Paxton Boys, 91
 sails to America, 78–79
- Penn, William, eldest son of William Penn, first proprietor of Pennsylvania, 17–18
- Pennsylvania, founding of; and definition of borders, 9–10
- Peters, Reverend Richard, Pennsylvania's provincial secretary
 commissioner for Pennsylvania, 22, 83
 letter to Mason and Dixon regarding location of survey marks in Forks of Brandywine, 94
 opinion of Thomas Cresap, 176
- Philadelphia
 latitude of 93 *see also* Plumsted-Huddle house
 Mason and Dixon's, site of observatory, 86, 87, 88, 91
 northern border of Maryland, fifteen miles south of, 20
 southernmost point of city, 85
 Philadelphia chain/foot, length of, 22, 243, 244
Philadelphia Packet, one of Penn's trading vessels
 delivers news of Mason and Dixon's safe arrival in America, 100
 sails for America with Governor John Penn, 78–79
- Picard, Jean-Félix, French astronomer, 240 *see also* Académie Royale de Sciences
- Plumsted, Thomas, tenant of so-called Plumsted-Huddle house, 86
- Plumsted-Huddle house
 Mason and Dixon establish latitude, 93
 search for original site, 86–87
 southernmost point of city of Philadelphia; city officials verify, 85
 traditional site in error;
Figure 14, 86
- Pocomoke Swamp, Mason and Dixon visit, 113
- Pontiac's Rebellion, 81–82, 147
- Post mark'd West, marking true latitude of the West Line, 107
 starting point for survey of West Line, 125; *Figure 19*, 107
- Potomac River
 Maryland's southern border, 7
 political and legal consequences if crossed by West Line, 138, 152
- precession of the equinoxes, 226
- Priggs, John, Maryland commissioners' surveyor, 26
- Princeton, New Jersey. Charles Mason visits college, 120

- provincial commissioners for
 - establishing the borders
 - Board of Trade and Plantations
 - orders appointment, 1732, 20, 23
 - Court of Chancery order
 - appointment, 25
 - engage Moses McClean as
 - commissary of the survey, 109
 - instructions regarding treatment of
 - Indian deputies, 175
 - learn of appointment of Mason and Dixon, 31, 82
 - meet with mayor and regulators to
 - confirm southernmost point of the city (of Philadelphia), 85
 - responsible for all surveying and
 - legal matters, 85
 - sign and seal Map of the Lines, 194
- refraction, atmospheric, 36
- regulator, astronomical *see* clock,
 - astronomical
- religion and the Great Awakening, 103
- resolution, optical, 68
- Ridout, John, commissioner for
 - Maryland, 84
 - slave trader, 147
